

Aviation Summer Weather Dashboard

Quick User's Guide

<http://testbed.aviationweather.gov/summerdashboard/>

Dashboard Overview

- Provides Day 1 and Day 2 forecasts for likelihood of convection
- Forecasts for both terminals and en-route
- Currently ZNY and Tier-1 ARTCCs
- Utilizes a web display similar to the Aviation Winter Weather Dashboard

Convective Forecast

- Short-Range Ensemble Forecast (SREF)
- Forecast Variables
 - Calibrated Probability of Thunder
 - Ensemble Mean Convective Cloud Top (CCT)
- Forecast Period
 - Hourly forecast periods through F15
 - Three-hourly periods out to F51

Convective Forecast

- Colors indicate probability of thunder
 - Different probabilistic thresholds for hourly and 3-hourly forecast periods
- Convective Cloud Top Height
 - Flight level shown if thunder probability reaches criteria for Nominal or higher

Prob	Hourly Thun	3-Hourly Thun
≥ 10%	Nominal	
≥ 20%	Slight	Nominal
≥ 40%	Moderate	Slight
≥ 60%	High	Moderate
≥ 80%	High	High

You are viewing a previous SREF run. When the dashboard automatically updates, the most recent SREF run will be shown.

Terminals and STARs

STARs are color-coded by terminal

- Terminals
 - SREF grid points 10nm within location of terminal
- STARs
 - SREF grid points within 10nm on either side of the arrival center line

You are viewing a previous SREF run. When the dashboard automatically updates, the most recent SREF run will be shown.

The Aviation Summer Weather Dashboard's purpose is to provide a decision support tool for the NOAA Aviation Weather Center.

the NOAA Aviation Weather Center. Summer weather impacts at major airports.

ARTCCs and Airways

Airways are color-coded by ARTCC

- Airways
 - SREF grid points 10nm on either side of airway center line
- ARTCC
 - Maximum thunder probability and highest convective cloud tops from all airways within that ARTCC

You are viewing a previous SREF run. When the dashboard automatically updates, the most recent SREF run will be shown.

The screenshot shows the ARTCC interface with a grid of flight data. The columns represent time slots from 09Z to 12Z. The rows represent different airports: KBOS, KBWI, KDCA, KEWR, KIAD, KJFK, KLGA, KPHL, DC, ZNY, ZBW, and ZOB. A red circle highlights the 'DC' row. A tooltip box is overlaid on the grid, stating "Select arrow to view airways for this ARTCC".
